

In the Abstract:

ABSTRACT OF THE DISCLOSURE

~~Light emitting diode arrangement for a high power light emitting diode and method for producing a light emitting diode arrangement~~

~~The invention relates to a~~ A light emitting diode arrangement, comprising at least one high power light emitting diode (34), the high power light emitting diode (34) being mounted onto a flexible ~~printed~~ circuit board (10). ~~In this case, the light emitting diode arrangement is distinguished primarily by its simple mounting. Furthermore, the invention relates to a~~ A method is also disclosed for producing such a light emitting diode arrangement.
